

Syllabus – Colored Pencil Drawing

Instructor: Nancy Giniger

The rich pigments of colored pencils bring life to any drawing. Layer them to produce complex colors. Burnish and blend them to create colored pencil drawings that resemble paintings. Wax-based and oil-based pencils alike provide the artist with a palette of brilliant color wrapped within the control and precision of a pencil.

- Week #1: An introduction to the medium and materials that are used. Learning the basic methods such as layering and blending. We will learn how to transfer the image and we will then apply the techniques used.
- Week # 2: Have your supplies ready. Bring in a colored image to work from. Away we go.....!
