Following my career in community mental health and a post-retirement coda teaching over 150 college and university courses, the prospect of retiring was daunting. **I wanted to keep on helping people and I hadn’t yet had my fill of teaching.** OLLI became a viable option to volunteer and to teach. Retirement fulfilled.

I have now instructed over 14 OLLI courses including “Neurotics, Psychotics, and Sociopaths”, “Cruising 101”, “Native Americans of the Southwest”, and “Aging Well”. OLLI students rock! Yes, compared to typical 20 something year-old college students, OLLI students are curious and eager to learn. Many young students are there simply because their parents told them they had to be there.

When I taught at several universities, I had a few MARS (mature adult returning students) in my classes. They always set the bar high for the younger students. **Imagine teaching at OLLI. What a treat! You have a classroom full of MARS.**

When my wife and I moved to Henderson 22 years ago, we purchased a home in Sun City Anthem. We sold that home two years ago and moved to Carnegie Heights, a community building for active adults over 55. Carnegie had many of the pieces in place for aging well including comfortable apartments for restorative sleep, a fitness center with strength and movement classes, a regularly changing menu for healthy nutrition and of course, a community of seniors for socialization. Yes, social connectiveness is one of the five pillars supporting longevity.

Four pillars were already in place that support aging well, but the fifth pillar was missing. The fifth pillar has to do with keeping the brain challenged, and ongoing lifelong learning fits that definition. To meet that goal, I met with Carnegie administration and presented a written proposal to establish “Carnegie College”. The College was launched in January 2022, and offers 2 to 3 lectures each month featuring experts from many fields. Subjects include history, health, and entertainment to name a few. There is no homework, and there are no tests. The College is marketed as “entertaining education”. It is structured in such a manner that, upon attending 16 to 20 lectures per year, student-residents can progress from freshman status all the way to senior status. Additionally, a graduation ceremony takes place every January. OLLI’s own Rob Levrant was the keynote speaker for the first graduation ceremony in January 2023. Carnegie Heights may well be the only residence of its kind to have such a structured learning experience in place. I view Carnegie College as OLLI’s little brother.

I may or may not become one of our country’s centenarians. Currently, there are about 90,000. However, I am doing all that gerontologists suggest I should be doing to live to be 100. **Thank you, OLLI, for assisting me in my quest.**

Three young women were brutally murdered—their bodies dumped in Chester Creek, Delaware County—by a serial killer who has confounded a slew of detectives and evaded capture for over thirty-eight years. With no new leads or information at his disposal, the detective contacts Venator for help, a company that uses cutting-edge investigative genetic genealogy to profile perpetrators solely from DNA evidence. Taking on the case, Madison Scott-Barnhart and her small team at Venator must use their forensic genealogical expertise to attempt finally to bring the serial killer to justice. Madison, meanwhile, has to weigh professional and personal issues carefully, including the looming five-year anniversary of her husband’s disappearance.

"IN ALL THE WORLD, NO TRIP LIKE THIS"
AMERICA’S GREAT LAKES
Welcome aboard! This class sets sail to explore the remarkable history of the Great Lakes—all five of them. From the early fur trading in the 17th century to the economic powerhouse that annually moves more than 143.5 million metric tons of cargo valued at $15.2 billion through the Great Lakes-St. Lawrence Seaway, its history merits attention. Innovation and invention were the hallmarks of regional development, and, there is more. One unique activity that emerged in the late 19th/early 20th century provided an economic boost to the port communities—steam powered passenger ships. Cruising the Great Lakes became a destination that enabled weary urban dwellers the opportunity to escape the stifling summer heat of the Midwest and East Coast, to relax and destress, and breathe fresh air.

Best practices for classes and meetings

- Be aware of your background and lighting. If possible, try to have light in front of you, rather than behind you.
- Try to have a neutral calm background, clear of distractions.
- Turn your microphone off until you would like to speak as background noise can be distracting.
- Make sure to turn off or silence your cell phone, just like you would during an in-person class.

Answer: No one should be Aging for Sh*ts and Giggles. We should be aging with intention. In this class, we'll collectively create new narratives about aging while sharing thoughts, suggestions, and ideas for: living empowered and free, de-weaponizing aging, reimagining aging as a gift and not a punishment, defusing the mindset that fuels ageism, changing negative aging attitudes into positive aging beliefs, normalizing getting old, and dismantling the notion that Anti-Aging signifies The Beauty and Aging represents The Beast. Class is fun and interactive with lots of takeaways. Bring your aging perceptions, interpretations, opinions, concerns, and discoveries to class for discussion.

Bringing to the far corners of the country, traveling circuses with their exotic animals, aerialists and especially equestrians, were always welcomed by throngs of people. GENERATIONS

Excerpt from Generations—The Real Differences Between Gen Z, Millennials, Gen X, Boomers, and Silents and What They Mean for America’s Future by Jean M. Twenge, PhD. The U.S. is currently populated by six generations: Silents (1925-1945), Boomers (1946-1964), Gen X (1965-1979), Millennials (1980-1994), Gen Z (1995-2012), and an unnamed generation born after 2013. The breakneck speed of cultural change means that growing up today is a completely different experience from growing up in the 1950s or the 1980’s or even the 2000’s. At a time when generational conflict is at a level not seen since the 1960’s, separating the myths from the reality of generations is more important than ever.

MORE UNRULY WOMEN WHO DARED TO SPEAK UP & ACT OUT: PART TWO

Historian, Arthur M. Schlesinger, Jr. once wrote, “Women have made up half the human race but you could never tell that by looking at the books historians write”. This course is a continuation of the Unruly Women spring program and will present a NEW list of famous, infamous and obscure American women, who refused to conform to the norms of their time period. Many names may not be familiar but their stories are unforgettable. They risked their reputations, their freedom and even their lives to achieve their goals in life. See what lengths these women went through in support of their beliefs. No need to have attended the spring program to enjoy this course and yes, gentlemen are welcome.

THE ART OF WRITING HAIKU POETRY
Explore the origins and history of beautiful poetry known as haiku. Create your own timeless expressions of mere moments in nature (as well as human nature); so brief, they can be described in a breath, in 3 or less lines, sometimes only 1 or 2 words. Chinese and Japanese poet-philosophers of the 14th (even earlier) through 19th centuries became masters or teachers of what we now know as short form poetry. Today its world-wide popularity has no cultural nor language boundaries. If you are taking this class for the first time, you will have an introduction to a new and fascinating poetry world. If you’re returning, interesting explorations are in store.

EPIDEMIOLOGY FOR THE NON SCIENTIST
The COVID pandemic caused a significant disruption in society. While we were dealing with a new and evolving virus, poor communications from political and public health leaders contributed to the uncertainty. A lack of understanding of the principles of epidemiology at all levels of society exacerbated the problem. This course's purpose is to provide a better understanding of the fac-tors that contribute to the spread of a disease in a community and to work through the steps in evaluating hazards and determining risks. An important takeaway from the course will be the un-derstanding of how we can attribute an outcome to a specific cause.

This semester we will look at the many combinations of collaborative artists who make American Musical Theatre what it is! As usual, we will spend a portion of every session looking at what is happening currently on Broadway in NY, on the West End in London, and right here in Las Vegas. PARABLES OF TODAY: UNDERSTANDING CHRISTIANITY THROUGH ENTERTAINMENT
Jesus used stories, "parables," to help his followers remember his teachings. His tales of The Good Samaritan and The Prodigal Son are considered two of the most popular short stories of all time. Intentionally or not, all forms of pop culture contain lessons which help us understand Jesus’ teachings today. Members will not only enjoy watching these examples (popcorn has appeared in the past and multiplied, like Jesus feeding the 5,000), they also will learn how to discern parables on their own.

THE QUEST CONTINUES: WHAT IS IT ABOUT A DOOR?
Have you given much thought to the concept of a door? Stepping into an office revolving door? Have you wondered who came up with the idea? And, what about hinges—why three instead of two? Clearly, a door can be a welcoming sign of hospitality or a barrier of entry. It could be an animal hide stretched across an opening or a rock rolled into place as Fred Flintstone might have used. Its style has evolved over many centuries and in many cultures. The materials used are as varied as the historical era they represent. This course will expand your appreciation of a patio door you slide or the remote control that opens your garage door. Doors are everywhere.

PASTELS, STICKS & PENCILS
Brilliant color that does not yellow with time, a velvety matte surface unlike any other medium, dry color that is capable of a range of effects—these characteristics are distinctive to pastels. Pastel drawings and paintings are stunningly beautiful, with rich textures and deep colors. Pastel’s look and feel results from the medium’s composition, a blend of finely-ground pigment and white extender coalesced with a minimal amount of binder (the latter merely enough to enable the artist to grasp the stick of color between the fingers yet crumble when stroked across a support). It is this powdery property that accounts for the delicate surface of works executed in pastel. Be prepared to get dirty and do wear old clothes or a cover up!

TRUMBO
Although Dalton Trumbo is best known as the man who broke the blacklist, he gave us something far more lasting through his deeply-humanist screenplays. Whether it be a woman determined to live life on her own terms (Kitty Foyle), or a boy fighting to protect the thing he loves most (The Brave One), Trumbo imbued his characters with tremendous courage and dignity. In so doing, he often challenged us to look to the best in ourselves. Defying the blacklist was only one part of Dalton Trumbo’s life. By discussing films made over the course of his lengthy career, this class will explore Trumbo’s political as well as creative legacies.

THE EMERGENCE OF THE EUROPEAN RENAISSANCE: CULTURAL INTERACTIONS BETWEEN EUROPEANS AND MUSLIMS

Other terms in the definition relate to cultural expressions like the arts, literature and learning, which include the sciences. These refer to cultural manifestations or characteristics that we group according to their style and content, as well as the time in which they were made. Renaissance arts and culture have a certain "look and feel". Two adjectives tell us more about their content and appearance: "classical" and "humanistic". Classical is a term used to describe the styles and learning of the ancient Greeks and Romans. Sometimes it implies ancient knowledge from other cultures as well. "Humanism" is an intriguing term specific to the Renaissance, which contains the root "human", a culturally universal term. Understanding both of these terms will require more elaboration. They will appear in several sections of this unit. Both are areas of interest to recent historians.

CRITICAL THINKING IN THE AGE OF SOCIAL MEDIA & ARTIFICIAL INTELLIGENCE
We prefer stories to statistics. We seek to confirm, not to question our ideas. We don’t understand the role of chance and probability in shaping events. We cannot comprehend very large numbers. We use heuristics (mental short cuts) and misperceive our world. We are deliberately deceived when things are presented to us using framing and anchoring. We have faulty memories. Social media has algorithms that intensify these errors. Artificial intelligence (AI) may weaken our inclination and ability to engage critical thinking. Can we apply critical thinking to some societal problems today?

THE BUSINESS SIDE OF SPORTS
Las Vegas has added four professional sports franchises to its roster in quick succession, joining minor league baseball and UNLV's NCAA Division 1 squads. Our long-standing minor league baseball team has re-branded into the Aviators and set attendance records at its new home field. Suddenly, we have many more games, a new arena and two stadiums, over 250 pro athletes, coaches, and staffers, plus additional media, hype, tax revenue, and exposure for our city. There is a lot going on away from the ice, the court, the pitch, and the $1.9 billion stadium. Can a market this size—with all its uniqueness and diversions—sustain so many teams and events? What's going to happen now that the Raiders have arrived? Each class we will examine the business behind our new and old teams and look at the inner workings that few fans ever think about. See how each team targets both residents and visitors in the Vegas market. Get to know who the local sports business “players” are. We will also discuss the big stories on the national sports business scene.

There will be three poems shared each class, with writing time allotted after each poem. Voluntary sharing after each writing segment will be included. **EVERYTHING YOU WANTED TO KNOW ABOUT BASIC ALGEBRA BUT WERE AFRAID TO ASK**

The first basic algebra class is the most important of all mathematics courses because algebra is needed to do all other advanced mathematics classes, including geometry! Basic algebra is similar to arithmetic because it uses the four basic operations of arithmetic plus numerals. However, arithmetic only uses arithmetic processes and numerals, and algebra is more generalized and uses variables and other unknowns. Hence algebra is much more powerful than arithmetic in describing relationships among numerals and unknown quantities. Certainly, algebra provides a deeper understanding not only of mathematics, but also of the world in which we live.

BROWSING IN THE LANGUAGE UNIVERSE

Language is arguably man's most distinguishing trait. "Homo loquens" (talkative man) would be a more apt classification than "Homo sapiens" (wise man); from cradle to grave we never shut up, but how often are we wise? The science of linguistics studies the origin and evolution of languages, their sound systems, writing systems, grammatical constructs, semantics, and social context. Our class will "browse" through this field, settling on topics that may be surprising, amusing, enlightening, or just plain cool. Does your language control the way you think? What is special about creole languages? How does English grammar differ from what you were taught in school? What weird and wonderful features can we find in other languages? Do Eskimos really have a gazillion words for snow? Course material will include excerpts from Great Courses lectures by linguist John McWhorter, video clips from internet blogs, and summaries prepared by the instructor from a variety of sources.

Fournier has been a Las Vegas resident for forty-plus years, qualifying him as a native by local standards. Ever the dilettante, he is delighted that OLLI at UNLV makes it possible to explore a wide range of topics without doing any actual work.

WHOLE-FOOD PLANT-BASED LOW-FAT EATING FOR DIABETICS - TYPE 1 OR TYPE 2

Have you heard that food is medicine? Have you thought about including more plants and less processed foods in your diet? Putting effort into learning about plant-based eating really made a difference, in my lab results and weight, and the way I feel. Because I was diagnosed as an insulin dependent diabetic late in life, I focused on the most effective and healthy way to manage diabetes. Insulin-resistance is the culprit in many chronic health conditions and eating plant-based can reduce inflammation as well as help our emotional and physical well-being. I would like to share this information with you and help you change your eating habits and improve your labs and generally feel better.

Her health improved as well as her lab results. She would like to share her knowledge with you.

The Phone-a-Thon has been a valuable opportunity for both growth and community building for OLLI at UNLV and our members. The annual fundraiser is a unique collaboration among OLLI’s membership, the administrative team, and the UNLV Foundation, helping cement the relationship between our institute and the university as a whole.

In addition to serving as OLLI at UNLV’s largest fundraiser, the Phone-a-Thon also serves as a strong community builder for the members. For our volunteer leaders, the Phone-a-Thon is a chance to talk to members they have not seen in a while, as well as get to know new members and listen to their experiences. In addition to generating revenue to improve our member experience, the Phone-a-Thon provides valuable feedback to guide and grow our program.

Phone-a-thon donations have had a tremendous impact on our learning community both inside and out of the classrooms, including renovations of our coffee room, computer lab, and library, upgraded classroom technology and furniture, and member scholarships. This year’s Phone-a-Thon donations will go towards securing a technology maintenance fund as we prepare for our move into our new building, as well as scholarships to remove financial barriers toward OLLI participation.

For more information, contact Rob Levrant, OLLI at UNLV Director, at robert.levrant@unlv.edu or 702-774-6554. To volunteer for our Phone-a-Thon, please complete the volunteer form, page 39, or contact: OLLIatUNLV@unlv.edu. Thank you.
Volunteers are so important to OLLI at UNLV! They instruct our classes, support our members, promote our goals and mission, fundraise, help with planning and communication and also with tasks around our Administrative Office.

We LOVE and NEED Volunteers Year-Round! We welcome you to sign up to help whenever you can.

Have some extra time between classes, stop by and sign some Birthday cards or stuff some envelopes! Love to talk to people, volunteer to call prospective new OLLI members or answer phones in our office. Like to greet people and let them know what is “happening” at OLLI, sign up to be a Coffee Room Host. If you are a Tech Savvy individual, volunteer to be a Classroom Host, in person or virtually. Only have a limited amount of time to give? We need help at Open House and Phone A Thon. We will also be very busy getting ready to move into our new building. We welcome any help with the move too! We really have something for everyone and we love to have you around.

Our Volunteer Form can be found right on page 39. We also have copies in our Administrative Office and in the classrooms.

Thank you to our current volunteers and welcome to our new ones!!
