About OLLI

The Osher Lifelong Learning Institute at the University of Nevada, Las Vegas (OLLI at UNLV) is a member-led, vibrant learning community of more than 1,500 retired and semi-retired adults. Our members continue a lifetime of learning by contributing to a program rich in content, shared interests, and life experiences. OLLI at UNLV offers special events, interest groups, and other member activities in addition to regularly scheduled study group courses. Our classes are purely for enjoyment—there are no tests, grades, or credits. Prior college experience is not required, only a desire to join your peers in the joy of learning. Each of our study groups is led by OLLI members who bring a lifetime of personal and professional experience to their classrooms. This spring we are proud to offer more than 80 interesting and stimulating study groups covering a wide range of topics at both our UNLV Paradise Campus location and satellite campuses. As a member, you’ll have access to as many of these classes as you wish for a one-time registration fee of $75. You can also take advantage of our annual membership, which registers you for three consecutive terms (including summer) for the discounted price of $150. For more information about the OLLI at UNLV program and membership, please call 702-774-OLLI (6554). OLLI coordinators are volunteers, and the opinions expressed in each class are their own. Feedback on coordinators is welcomed by the OLLI at UNLV Curriculum Committee.

President’s Message

WE’RE PROUD TO PRESENT YOUR SPRING 2016 CATALOGUE

This message is for both returning and prospective OLLI members. You are all warmly welcome to the first semester of our 25th Anniversary Year! As returning members know, 2015 was a year of growth and change. Our membership is now above 1500 annually, and we continue to offer between 75 and 80 peer-led courses during the spring and fall semesters. Even during the long, hot summer, we offer 30+ courses at the Paradise Campus and at our more-than 7 satellite campuses around the Valley. If you have additional ideas for courses you would like to take, or offer, please let us know (702-774-OLLI), and our Curriculum Committee will be happy to work with you to get them on the map!

Looking forward to seeing you in February!

Cathy Lowe, OLLI Board President

Director’s Message

It is such an honor to welcome you to the 25th year of the Osher Lifelong Learning Institute at UNLV! With classes on topics ranging from economics to fine arts, from mathematics to literature, from geology to genealogy, Star Trek to foreign language, OLLI at UNLV offers something for everyone. Whether you are taking classes on the Paradise campus, or right in the community room in your own neighborhood, we are glad that you have found OLLI to continue pursuing your love of learning.

However, OLLI at UNLV is so much more than the classes we offer and the opportunity to teach. Whether you choose to join our hiking club, volunteer for one of our fourteen committees, serve on our board of directors, or meet friends for lunch in the 500 building, OLLI at UNLV is first and foremost a community of learners. It is my hope that in your classroom discussions or out-of-classroom experiences, you are creating friendships and connections that will enrich your lives beyond the curriculum.

Joining OLLI at UNLV is also an opportunity to become part of a larger learning community – that of one of the most diverse research universities in the United States. Members of OLLI are encouraged to take advantage of the many opportunities in our university’s community of learning, including library resources, fine arts and athletic events, lecture series, and volunteer opportunities.

The OLLI at UNLV administrative team looks forward to seeing you in person on campus, and we are ready to help you register for classes, show you around, and find many ways for you to become involved.

See you soon!

Rob Levrant, Director, OLLI at UNLV

Individual Class Registration Information

In order to maximize the use of limited resources like classrooms as well as allow coordinators to prepare for their classes in advance, OLLI members are strongly encouraged to sign up for courses before the start of the semester.

WHAT YOU NEED TO KNOW:

• Online registration will open at 10am on Monday, January 25, and will close at 4pm on Friday, January 29.

• A link to the registration system will be posted to the OLLI website: http://olli.unlv.edu/courses starting at 10am on Monday, January 25.

• You will not be required to log in to your account, just enter your name, email address and phone number, then make your class selections.

• In response to overwhelming feedback, registrations will be processed on a first come, first-come, first-served basis. Lotteries will no longer be conducted for classes that reach their maximum capacities. Also, waitlists will no longer be created for full classes. Registrations will be date-and-time stamped and will be processed in the order in which they are received.

• Members are strongly encouraged to pre-register for courses online. The online system can be accessed by visiting this website: http://olli.unlv.edu/courses.

• Registrations can be processed over the phone by calling 702-895-3394. If you choose to register by phone, please be patient as there are limited phone lines and staff available to process registrations.

• Members can also visit the information desk to register for classes. Again, please be patient as the staff will be processing registrations over the phone as well as for visitors to the desk. It is STRONGLY recommended that members register online if at all possible. The OLLI at UNLV computer lab will be available for those members who would like to register online but do not have access to home computers.

• Whether online, by phone, or in person, pre-registration will not open until 10am on Monday, January 25.

• Once the registration period closes on January 29, registrations will be processed. Classes may be moved to different rooms to accommodate as many members as possible and to avoid full classes whenever possible. Enrollment confirmations will be emailed to members on February 5.

We hope these changes will result in more members having access to classes that attract their interest.

GREAT NOVELS YOU NEVER KNEW PART 5

From a movie universe of 30,000 titles there is but a handful that work both as novels and films. Successful film adaptations can be excellent introductions to novels you never knew. We will be looking at the frenetic world between the wars in The Great Gatsby. In Mary Shelley’s Frankenstein we will examine the author’s highly unconventional life. For the Ballad of Narayama, the subject is the age-old practice of gerontocide. LeCarre’s The Spy Who Came in from the Cold is an inside look at Cold War spy craft; Joyce Cary’s The Horses’s Mouth about the quintessential starving artist.

The interaction between Eastern Woodland Indians and European colonizers represents the beginning of a political and economic tug-of-war that lasted more than 150 years. The Huron, Ottawa, Iroquois, Wyandot, and Powhatans are representative of multiple tribes making up this cultural group. Their ancestral homelands stretch as far north as the Great Lakes region and into Canada, to the Ohio River in the south, west to the Mississippi River Valley, and to the Atlantic seaboard. Despite geographical and cultural differences they bargained, bartered, fought, and died for a singular purpose—the preservation of their way of life. In addition to examining the political and economic encounters of these First Americans, the material culture of the Eastern Woodland Indian including the importance of wampum, masks, basketry and pottery will be introduced.

POWELL AND PRESSBURGER: THE POWER OF ART & IMAGINATION
Although *The Red Shoes* is possibly the most popular and visually entrancing dance film of all time, the producing, directing, and writing team of the British Michael Powell and the Hungarian Emeric Pressburger created numerous other visual odes to the power of art and the imagination, always going against the realist strain of British cinema. Known by the name of their production company, the Archers, Powell and Pressburger forged a working alliance that lasted from the late thirties to the early seventies. They worked in a range of styles, from the anti-Nazi propaganda of *49th Parallel* and the astoundingly designed and edited epic *The Life and Death of Colonel Blimp*, to the erotic, magical excesses of *A Canterbury Tale*, *Black Narcissus*, and *The Tales of Hoffmann*.

STRENGTH AND BALANCE TRAINING

Think you’re too old to start a strength training program? Well think again! Strength training is just what your body needs to fight the loss of muscle, bone mass, and strength that comes with age. Adults lose between five and seven pounds of muscle every decade after age 20. Strength training will help prevent this muscle loss, and rebuild what you may have lost. More importantly, it will improve your ability to do everyday activities. The stronger your muscles, the easier it is to get groceries out of the car, get a package off of the top cabinet shelf, push the lawnmower - the list goes on and on. The class will start out with a 10 minute warm up followed with weight training exercises for the full body. The class will focus on proper form, technique, and breathing for weight training. A balance training program will be conducted in the second half of the class. The class is designed for any level of participants; beginners are especially welcome. Bring light weights, towel, and water.

Although our focus will be literary, those of us not oriented to the time and place where the Civil Rights struggle was in its infancy should come away with some answers to the question, “What were they thinking?”

Many people regard economics as “the dismal science,” dedicated to trade balances, GNP, unemployment statistics, etc. Economists, however, have been turning their attention to unconventional new areas—why we are willing to follow the opinion of strangers when making important decisions, how we choose our spouses, or why we decide to donate our organs, for example. This course will take a look at unexpected topics of economics such as the commerce of surrogate pregnancy, terrorism as an occupational choice, charity and gifts, loss aversion, addiction versus choice, voting and politics, and the pursuit of happiness.

FATE, FUN, AND PHILOSOPHY
Fate, Fun, and Philosophy is an updated version of the prior Your Philosophical World. Beyond its educational value, it now carries an entertainment component. As a living philosophy, it is layered over 23,000 lifetime conclusions on the human condition. It addresses all questions as to: who and why you are; how man thinks and dreams; and how words, notes and numbers serve as “the tools of the mind.” The lecture content will separate the brain from the mind with provocative titles the likes of: Are you civilized?, the Veil of Eternity; Are you a lover?, or the Power of Shame. Have some philosophical fun while you still can. The course is a perceptive education and often poetically enhances the “timeless facts of life,” by way of the Socratic Q & A format, guest lectures, know thyself questions, and open discussions. As year-round, three-term lectures, they focus on man’s controlling 50 to 100 prime words and “categories of thought.” Each term, in total, will profile the entire human condition.

PERCEPTION V. REALITY: SHOULD YOU BELIEVE THAT?
Advertisers, politicians, religious groups, the internet, and even our friends regularly attempt to persuade us to adopt their beliefs. Together we will try to ascertain the facts and evidence so that we can each individually decide what to accept and what to reject. Using the scientific method, this class will explore a different topic each week. We will conduct our own experiments where possible and will rely on videos and readings where we can’t do the tests ourselves.

HISTORY’S GREAT MILITARY BLUNDERS
All battles are in some degree “disasters.” These words by military historian John Keegan are true in that military conflicts inevitably involve death and destruction. Yet despite their tragic cost, many battles are regarded as great triumphs, while others are nearly universally declared blunders. The Great Courses lecture series by Gregory S. Aldrete, Ph.D. serves as a launching point for discussing some of the best-known military catastrophes and finding the common threads that qualify these battles for special condemnation.

TWEAK YOUR MIND
The modern world’s harried pace can be stressful for an older generation who grew up in more relaxed times. Stress can negatively affect our health and our satisfaction with life. Together we will identify situations that add stress to our lives, see how many of those negative dynamics we can avoid, and learn to deal with stress in a more positive way. Situations we currently refer to as negatives will become positives if we know how to perceive them. The “fear factor” sometimes makes us feel guilty if we fail to follow the advice thrust upon us every day from all the media, to do this and not do that. We might learn to avoid some of those dire warnings with a good sense of humor, a positive attitude, and ideas for new thinking about ourselves and others. This is a class where your opinion counts and where we can disagree with total respect for one another.

BEGINNS: Wednesday, February 10
TIME: 1:45PM – 3:30PM		ROOM: 301

Coordinator: Ruth Elliot has been teaching at OLLI at UNLV for eight years. During her first four years, she taught every semester on campus, as well as at Merrill Gardens and Humana Henderson. She has attended many conferences and smaller study groups across the country, wherever her husband’s profession took them.

WEDNESDAY STUDY GROUPS

TWEAK YOUR MIND
The modern world’s harried pace can be stressful for an older generation who grew up in more relaxed times. Stress can negatively affect our health and our satisfaction with life. Together we will identify situations that add stress to our lives, see how many of those negative dynamics we can avoid, and learn to deal with stress in a more positive way. Situations we currently refer to as negatives will become positives if we know how to perceive them. The “fear factor” sometimes makes us feel guilty if we fail to follow the advice thrust upon us every day from all the media, to do this and not do that. We might learn to avoid some of those dire warnings with a good sense of humor, a positive attitude, and ideas for new thinking about ourselves and others. This is a class where your opinion counts and where we can disagree with total respect for one another.

BEGINNS: Wednesday, February 10

Think you’re too old to start a strength training program? Well think again! Strength training is just what your body needs to fight the loss of muscle, bone mass, and strength that comes with age. Adults lose between five and seven pounds of muscle every decade after age 20. Strength training will help prevent this muscle loss, and rebuild what you may have lost. More importantly, it will improve your ability to do everyday activities. The stronger your muscles, the easier it is to get groceries out of the car, get a package off of the top cabinet shelf, push the lawn mower - the list goes on and on. The class will start out with a 10 minute warm up followed with weight training exercises for the full body. The class will focus on proper form, technique, and breathing for weight training. A balance training program will be conducted in the second half of the class. The class is designed for any level of participants; beginners are especially welcome. POWELL AND PRESSBURGER: THE POWER OF ART & IMAGINATION

Although The Red Shoes is possibly the most popular and visually entrancing dance film of all time, the producing, directing, and writing team of the British Michael Powell and the Hungarian Emeric Pressburger created numerous other visual odes to the power of art and the imagination, always going against the realist strain of British cinema. Known by the name of their production company, the Archers, Powell and Pressburger forged a working alliance that lasted from the late thirties to the early seventies. They worked in a range of styles, from the anti-Nazi propaganda of 49th Parallel and the astoundingly designed and edited epic The Life and Death of Colonel Blimp, to the erotic, magical excesses of A Canterbury Tale, Black Narcissus, and The Tales of Hoffmann.

MASTERWORKS OF AMERICAN ART

A nation’s identity is expressed through its art. Great painters capture the essence of a culture’s hopes, anxieties, and aspirations. This semester students will encounter the brilliant paintings of our homegrown masters who documented the birth of our nation from its colonial roots up to the brink of World War I and the birth of Modernism. Professor William Kloss’ Great Courses lectures lead us through the great artistic legacy of our country. Sometimes borrowing from European models, just as often departing from them, American artists pioneered new attitudes and styles to express the aspirations of a new nation. By placing artistic tradition in its historical, cultural, and political contexts, students will discover how appreciating the legacy of American art is crucial to understanding the story of our nation.

THE WISDOM OF HISTORY
Do the lessons passed down to us by history—lessons whose origins may lie hundreds, even thousands of years in the past—have value for us today? We will use Great Courses lectures by Dr. Rufus Fears to help us discern whether events that happened in the past hold valuable lessons for the present. Class discussion will help relate history to our modern experience.
