The mission of OLLI at UNLV is to challenge the mind and stimulate the spirits of retired and semi-retired adults by offering learning activities designed to enhance understanding of the world, encompassing its historic, cultural, and social aspects.”

PRESIDENT’S MESSAGE
Welcome to the Spring 2018 semester of OLLI at UNLV. I would like to open by saying that it is truly an honor and a privilege to be part of this wonderful program. Since I joined OLLI at UNLV, I have been presented with countless opportunities to engage with people of similar interests, explore new avenues of learning, and participate in a social environment that has provided many new friendships as well as a path for personal growth. I hope that each new and continuing member has a similar experience.

We are a member-driven program that relies on the participation of our members. Our committees are the backbone of OLLI and your willingness to volunteer will provide a continued legacy that will ensure that OLLI at UNLV has a sustainable future.

Our spring catalog offers a wide variety of courses. Our diverse curriculum suggests our biggest dilemma will be deciding which classes to take. The spring open house can help with those decisions and assist you to make your OLLI at UNLV experience complete. I look forward to meeting each of you this semester and thank you for being a part of OLLI at UNLV.

Our classes are purely for enjoyment—there are no tests, grades, or credits. Prior college experience is not required, only a desire to join your peers in the joy of learning. Each of our classes is led by OLLI at UNLV members who bring a lifetime of personal and professional experience to their classrooms. This spring we are proud to offer more than 90 interesting and stimulating classes covering a wide range of topics at both our UNLV Paradise campus and satellite locations. As a member, you will have access to as many of these classes as you wish for a semester membership fee of $75. It is an honor to welcome you to the spring semester of 2018 at the Osher Lifelong Learning Institute at UNLV. Whether you are taking classes on the Paradise campus, or right in the heart of your own community, we are glad that you have found OLLI at UNLV to continue pursuing your love of learning. OLLI at UNLV is a member-led program where each of our nearly 100 classes are taught by volunteers from within our membership. However, OLLI at UNLV is so much more than the classes we offer and the opportunity to teach your peers. Whether you choose to join our hiking club, volunteer for one of our fourteen committees, serve on our board of directors, or meet friends for lunch on the Paradise campus, OLLI at UNLV is first and foremost a community of learners. I am delighted to lead a small, dedicated staff; we are here to assist each of you in connecting to the university and community at large through our operational support, so that our member leaders can provide the classes, programs, clubs and events that you are seeking. As OLLI at UNLV members, we invite you to take advantage of your student status at a growing university by attending lectures, athletic events, the performing arts, or even our nationally-recognized library. The OLLI at UNLV administrative team looks forward to seeing you in person on campus, and we are ready to help you sign up for classes, show you around, and find many ways for you to become involved.

Academic Partnerships and Research

OLLI at UNLV is proud to be a part of UNLV’s vibrant academic community and supports the university’s Top Tier Initiative. The UNLV Top Tier Initiative is a pathway to become one of the top 100 American research universities, as designated by the Carnegie Foundation as a Highest Research Activity (R1) University. To that end, OLLI at UNLV actively partners with multiple academic units on their research endeavors.

2017 SOLAR DECATHLON: “SINATRA LIVING”

Howard R. Hughes College of Engineering, UNLV School of Architecture

After several months of construction in the southeast corner of the Paradise campus, followed by a trek to and from Denver, Sinatra Living, the UNLV Howard R. Hughes College of Engineering’s entry into the U.S. Department of Energy’s Solar Decathlon competition, has returned. The solar decathlon challenges college student teams to design and build full-sized solar powered houses. Sinatra Living is a zero energy, “age-in-place” home with futuristic features in a mid-1960s design theme.

The contest rated the homes on ten categories including architecture, water, market potential, health and comfort, engineering, energy, communications, appliances, innovation, and home life.

While the home placed 8th overall, Sinatra Living ranked first in innovation, and second in both architecture and engineering, two of the key focuses of the UNLV team. Due to a late finish on the home, and a miscalculation in energy usage, the home did not place in the top three.

Suggestions for the design of the home came from the OLLI spring 2016 open house where engineering students displayed plans for the home and asked OLLI members for their ideas. Once the home is placed in its permanent site on the UNLV campus, plans are already underway to provide tours to OLLI members as well as allowing OLLI to utilize Sinatra Living for meetings, events, and even classes! The home will also be used for research in engineering, health, design, and architecture. The College of Engineering will soon begin planning for the 2020 Solar Decathlon, with the hopes of bringing home victory by incorporating lessons learned from their two previous entries.
SEXUAL HEALTH STUDY

UNLV School of Nursing

OLLI will host Dr. Cheryl Maes during a spring Brown Bag session to share the results the sexual health study she completed in fall 2016 with male members of OLLI at UNLV and OLLI at the University of Arizona. The purpose of this study was to determine the level of distress associated with perceived stress and sexual function among community-dwelling older adult males. The study aims are to 1) describe perceived stress and sexual function in a community-dwelling older adult male population, 2) describe the relationship between perceived stress and sexual function, and 3) describe the relationship between perceived stress and sexual function while controlling for individual characteristics of the sample. These study findings may serve as a foundation for enhancing sexual function, thus establishing improved sexual health and quality of life among older adult males.

Cheryl Maes earned her B.S.N. and M.S.N. from UNLV, and her Ph.D. in nursing from University of Arizona. She has more than 24 years of nursing experience, including 17 years as a family nurse practitioner. Her clinical background includes medical surgical nursing, public health nursing, and primary care. Since 2000, she has held national certification as a family nurse practitioner through the American Nurses Credentialing Center. Maes teaches in UNLV’s undergraduate and graduate nursing programs. Her research interests include the physiological and psychological effects of stress on health within vulnerable populations, health promotion and reducing health disparities among vulnerable populations, sexual health, and using alternatives such as yoga or tai chi to improve sexual function among older adults.

NURSING STUDENT OBSERVATIONS

UNLV School of Nursing

In partnership with the UNLV School of Nursing, OLLI at UNLV is proud to host undergraduate nursing students at various times throughout the year at the Paradise campus. This multi-generational program provides an opportunity for undergraduates and OLLI members to attend and participate together in class, join each other for lunch, and engage in a variety of conversations. In addition, retired nurses from OLLI have an opportunity to share their own career experiences and the lessons they have learned with those who will be following in their footsteps.

OTHER ACADEMIC PARTNERSHIPS

OLLI at UNLV brings the university to our members through a wide variety of partnerships. Collaboration with the Department of Sociology, for example, generated research about our members which helped us to better tailor our programming to meet their needs. Courses including Lunchtime Brown Bag, Soap Box, and Professor’s Choice bring academic faculty and university administrators to speak with members about their research and upcoming projects.
Course Listing by Subject

OLLI at UNLV offers a broad spectrum of courses for all interests. Unless otherwise noted, courses are held at Paradise campus. Members get unlimited classes at all campuses for one membership fee! Please note space may be limited based on classroom capacity and other factors.

GREAT NOVELS YOU NEVER KNEW PART VII

Motion picture adaptations of books too often disappoint those of us who love good films; arguably only a few dozen movie adaptations have the artistry to withstand the test of time. The presented film masterpieces not only do justice to their original novels, but they build on the original messages. In many cases, print and film versions of the same story are together able to give us insight into the way people lived in other places and times. In Cold Comfort Farm, contemporary writer Stella Gibbons creates an eccentric comedy of manners about a 19th century would-be London socialite, who is relentlessly determined to help remove her rural cousins from their decaying farm. Orson Welles creates in Jane Eyre a memorable flawed hero, Rochester, in a Hollywood version of the archetypal romantic novel. In Aldous Huxley’s Brave New World, humans are literally produced in baby factories to meet the requirements of the job market. This book is based on a dystopian novel that accurately predicted trends that exist in today’s society. In Franz Kafka’s The Trial, Orson Welles plays an attorney in a case where the falsely accused defendant will literally die before he can get a hearing. Zeferelli’s Romeo and Juliet places a couple of teenagers in the starring roles and makes a thoroughly accessible and fresh performance, especially for people who otherwise hate the idea of sitting through any of Shakespeare’s plays. In The Ruling Class, Peter O’Toole plays the mad son of an earl who believes he is God, a comedy targeting British institutions.

Instructor: Neal Graham retired in 2013 after 30 years as an officer and principal in a closely-held commercial real estate company in Manhattan. His first choice career, since he majored in English at Columbia University and the University of Vermont, was always to teach at the college level. Ever since the early 70s when he found it necessary to leave academia for the business world, he has wanted to get back to the classroom. At OLLI at UNLV he found students with far greater depth, on average, than he ever found teaching twenty-somethings four decades ago.

Open discussion follows, although questions are encouraged at any time during the presentation. The coordinators prepare for a broad range of potential questions and the guest speakers are chosen for their expertise in the various topics. Topics are typically in the news and include politics, social questions, environmental issues, and cultural subjects.

BROWSING FURTHER INTO THE LANGUAGE UNIVERSE
This course will be a continuation of the Browsing course offered in the previous term, but essential material from the earlier course will be reviewed for the benefit of new class members. The science of linguistics studies the origin and evolution of languages, sound systems, writing systems, grammatical constructs, and how words acquire meaning. Two broad principles emerge: all languages are different in deliciously idiosyncratic ways, and all languages are the same at a deep level that reflects the structure of the human mind. This will not be an academic linguistics course, but instead a series of diverting encounters with topics chosen for their intrinsic interest and accessibility to the layman. Lectures will present excerpts from Great Courses and YouTube videos as well as citations from written works. Sources will include linguist John McWhorter, cognitive psychologist Steven Pinker, poets John Ciardi and Ogden Nash, stand-up entertainer George Carlin, and numerous lesser known contributors. In a larger sense, though, the source material is the 6000 fascinating languages of our world.

Instructor: Art Fournier encountered computers at Nerd Central (also known as MIT) in the 1960s, and went on to a career creating and maintaining software for the Air Force, private companies, and municipal government. Information technology has evolved so fast, however, that he has no clue what is wrong with your laptop. Fournier has been a Las Vegas resident for forty-plus years, qualifying him as a native by local standards. Ever the dilettante, he is delighted that OLLI makes it possible to explore a wide range of topics without doing any actual work.

COSMOLOGY: HISTORY AND NATURE OF OUR UNIVERSE
Cosmology is the study of the origin and nature of the entire universe. Despite its apparently esoteric nature, much of the cosmological story is directly accessible to our intuition and can be told in everyday language. Our study will be based on Great Courses lectures by University of Virginia professor Mark Whittle. The course assumes no prior knowledge of astronomy, yet will take us well beyond more traditional astronomy survey courses.

He was a project engineer during the Skylab program and was responsible for planning and scheduling during the Space Shuttle and Space Station programs.
EVOLUTION OF HUMAN SOCIETY

Discuss various topics that should be of interest to all of us, especially to participants in the class. The topics covered will be provocative, and may be controversial. Be prepared for lively and spirited discussions.

BEGINS: Tuesday, January 23
TIME: 1:45-3:30PM

Instructor: Bill Malkenson has lived in Las Vegas for more than 25 years and worked as a professional poker player, Realtor, and investor. 69 years’ life experience has given him the chance to observe and contemplate the events that have happened in his lifetime and throughout history. This will be his fourth class as an instructor.

SCIENTIFIC SKEPTICISM: PERCEPTION VS. REALITY

Perception v. Reality gets a reboot for the era of “fake news.” We will look at how we think and analyze information to reach conclusions about what is true or real. Explore techniques used by those who wish to influence us to buy their products or ideas. Gain confidence evaluating information and coming to your own conclusions. Each week we will look at a new topic. For example: What is Fake News? Are GMOs harmful Frankenfood? Are ghosts real? How do psychics make their predictions? Do vaccines cause autism? Are crop circles created by aliens or pranksters? What about probiotics, ear candles, homeopathy or overpopulation? We will do demonstrations whenever possible and look for evidence for what to believe and what to discard as untrue. There will be a strong emphasis on psychological processes and the scientific method. Also look at how logical fallacies can lead us astray and what we can do to choose what to believe and what not to believe in a rational way. Of course, the final decision about what is real or true will always be left for each individual to decide for him/herself.

BEGINS: Tuesday, January 23
TIME: 1:45-3:30PM

Instructor: Gail Knapp retired after teaching psychology for 38 years in a Michigan community college. She moved to Las Vegas to escape the snow and ice, and because she had fallen in love with the city during a regular summer visit for an annual conference on scientific skepticism. The conference was about the use of science and evidence to study the truth of claims. It is that interest that sparked the creation of the Perception v. Reality Course for OLLI that she taught for three years. With the current political world filled with the use of psychological manipulation to get people to buy ideas, she believes that the only hope for rational decision making is education in the techniques that they use. So, she reworked the Perception v. Reality course to include more logical fallacies and analysis of the news. Knapp currently is an OLLI board member and board secretary.

SPANISH PRONUNCIATION

When the instructor first came to OLLI at UNLV she was asked to teach a Spanish class, but felt that learning a language for 90 minutes a week for 13 weeks wouldn’t work. Then she found a small book with pictures accompanied by sentences in both English and Spanish, and developed additional tools that made this class feasible. This class will focus only on pronunciation and reading. Now you will be able to read the translation in your smart phones or travel guides and improve your pronunciation. Required text: Barron’s Spanish Visual Language Guide: Learn With Pictures (ISBN: 9780764122804).

BEGINS: Tuesday, January 23
TIME: 1:45-3:30PM

Instructor: Lidia Mauer is a native Spanish speaker from Argentina, where she taught Spanish in the schools. After her family moved to the U.S., she taught adults in a private language academy for many years.

BARBARIANS, PLAGUES, FANATICS, AND MADMEN: THE SURPRISING ADVENTURE OF ENGLISH

Travel through more than 1500 years of English language history—a history full of twists, turns, and fascinating events. We will watch an eight-part British TV series titled, The Adventure of English. Our study will be supplemented by presentations, additional videos, class discussions, games, and puzzles. Discover fun facts such as: For over 300 years the language of the English court and judiciary was French; English kings spoke no English! Bubonic plague (the “black death”) helped save the English language. A criminally insane murderer was one of the creators of the Oxford English Dictionary. A little blue book that sold for 14 cents a copy was one of the most influential books in the history of English. English shares roots with ancient languages such as Sanskrit. The original meaning of “girl” was a child, either a boy or a girl. Benjamin Franklin came up with over 200 colorful phrases for being drunk, including, “he ate a toad and a half for breakfast,” and “he sees two moons.” Let’s learn about the fascinating history of English and have fun doing it!

GLOBALIZATION AND THE NEW WORLD ORDER, PART II

Globalization has become a buzzword and is often promoted at the highest levels of corporate and political power as inevitable, economically beneficial, and a quantum advance in civilization itself. Others, however, believe globalization’s main effect has been the control and destabilization of governments by multinational corporations. Is globalization tied to the theory of a “New World Order,” purported to be a covert international program characterized by a world government that supersedes the authority of the national governments of its nation-state members? On a worldwide scale, we will look at the human costs of globalization’s efficient movement of goods, services, and information. We will examine undeniable successes in reducing world poverty. We will explore the social consequences of uncontrolled migration across national borders. Finally, we will look at the relationship between exponential worldwide population growth, stressed resources, and political stability. Topics to be considered this term are: Japan’s post-World War II economic miracle; the asset bubble crash of the 1990s; the Middle East’s curse of oil wealth; political Islam’s relationship to escalating worldwide terrorism; Africa’s natural resources and reasons for optimism about the continent’s future; and Latin America’s post-colonial autocratic and socialist governments.

Instructor: Neal Graham retired in 2013 after 30 years as an officer and principal in a closely-held commercial real estate company in Manhattan. His first choice career, since he majored in English at Columbia University and the University of Vermont, was always to teach at the college level. Ever since the early 70s when he found it necessary to leave academia for the business world, he has wanted to get back to the classroom. At OLLI at UNLV he found students with far greater depth, on average, than he ever found teaching twenty-somethings four decades ago.
HAPPINESS: SUCCESS ON SPEED
Power your life for happiness and success by pursuing the four “goods” you need to be happy: Being Good, Feeling Good, Making Good, and Doing Good. Embrace this journey of self-improvement with courage and intention, and you will see miraculous improvements to your personal happiness. Lectures will be interspersed with interactive class exercises and assignments. Being Good is the development of character; we will concentrate on developing a positive mindset, personal integrity, and spirit. Slow down your mind with meditation and mindfulness, and listen to your inner guide. Feeling Good covers health, happiness, physical joy, and expression of joy to others. Explore at least 20 techniques for choosing actions and thoughts that can rapidly shift your “feel good” thermometer. Making Good is the concept of attracting prosperity through attitude and action. There is no specific formula for developing a multi-million dollar asset base tomorrow, but you can attract richness in your life by making hard decisions and implementing actions necessary to be prosperous. Doing Good encompasses how you treat others, your environment, your community, and how you help others. Doing good releases powerful substances allowing euphoric states.

BALANCE, STRENGTH, AND STRETCHING
Come and enjoy 30 minutes of balance training, 30 minutes of strength training, and 30 minutes of stretching! For older adults and seniors who want to stay healthy and independent, the National Institutes of Health (NIH) recommends balance, strength, and range of motion exercises. Balance exercises build leg muscles, and this helps to prevent falls and related fractures. Strength exercises build older adult muscles and increase metabolism, which helps to keep weight and blood sugar in check. Stretching exercises result in more freedom of movement, which will allow you to be more active during your senior years. We will focus on proper technique, form, and breathing. The class is designed for any level of participants; beginners are especially welcome. Bring light weights, towel, and water.

FIRST LADIES AND THEIR HUSBANDS, PART II

Before Facebook, Twitter, or the National Enquirer, First Ladies were the most well-known women in the country during their husband’s term in office. They were married to the most powerful man in the country and, in the last 100 years, the leader of the most powerful country in the world. We are familiar with their public face, but what about their private lives—their upbringing; their marriages; their children? What went on behind closed doors and out of the public view? Discuss some of the most interesting of these unique ladies and their effect on their husbands’ lives and legacies both before and during the presidency. The course will explore the evolution of women’s inclusion in public life and affairs from the 18th century through the 21st century. The class will have an abundance of opinions as well as facts, so class participation and exchange of ideas is encouraged and welcomed.

**COMMON MATHEMATICAL MISCONCEPTIONS**

Your teachers tried to make math easy for you, right? It may not seem that way, but the pre-college math curriculum takes some shortcuts and omits important mathematical details to make the subject more palatable for teenagers. As a result, students leave high school with certain misconceptions about math and how it works, which can add to the difficulty of learning more advanced subjects later on. In this course we will debunk some of the common misconceptions and hopefully rekindle your enthusiasm for the subject, so you can continue learning new and exciting ideas in mathematics. Topics include: Adding Numbers Takes Time; Four Does Not Divide Nine; Geometry is Founded on Euclid’s Elements; Algebra is Boring; and Geometrical Formulas Should be Memorized.

Videos from The Great Course, Understanding Genetics: DNA, Genes, and Their Real-World Applications, TED talks, and other current material will shape our course. We will complete lab activities and simulations, where appropriate. Students will be encouraged to pose questions related to the next weekly topic; answers will be incorporated into class presentations. JAZZ APPRECIATION

Build your knowledge and shared appreciation of jazz, one of America’s greatest art forms. Jazz Appreciation at OLLI blends lectures and documentaries on jazz history with discussions of the influence jazz had on popular music, guest speakers from the local jazz community, and of course our very popular live performances. The topic will be approached as a journey through the music world, highlighting the birth of jazz and how it continues to develop and evolve through time. AFTER A MAJOR DISASTER: “CAN YOU HEAR ME NOW”

Modern cell phones are capable of much more than just sending and receiving phone calls. Mobile phones allow users to send and receive text messages, emails, photos, and video, as well as access the Internet, play games, listen to music, use GPS (Global Positioning Systems), and more. Cell phones put all this communication capacity at our fingertips, yet one study shows that the cell phone socially insulates Americans more than ever before. Recent natural and man-made crises have put Americans’ reliance on cell phones as a primary means of communication on full display. During a disaster many people run for their cell phones first in order reach out and touch someone, anyone! For some, communication with those not present takes precedence over interacting with those in the same room. We will examine the big and small ways that mobile devices have revolutionized the way we interact with our world.

Anderson Graduate School of Management at UCLA, and a master of science in electrical engineering (MSEE) from the Naval Postgraduate School, Monterey, CA.

CONSPIRACY: 9/11/2001

There are few dates in the modern era that evoke stronger feelings for Americans than September 11, 2001. This was the largest attack by a foreign entity in the history of the United States. How could it be that 19 hijackers armed with only box cutters could cripple this country? We will examine the events of that day including the flight paths of the four planes. A closer look at the sites in Shanksville, PA and the Pentagon may make you question the official version of events. The released final report of the 9/11 Commission was considered by many to be as worthless as the Warren Commission Report, leaving many questions unanswered. Guest speakers will include local reporters, an airline pilot, and a structural engineer.

BEGINS: Thursday, January 25
TIME: 9-10:45AM

Instructor: Mark Marcario has had a lifelong interest in the events of Nov. 22, 1963. He was involved in the last two investigations of the JFK assassination. GREAT ARTISTS OF THE ITALIAN RENAISSANCE

This Great Courses lecture series introduces the art of the Italian Renaissance—the epoch that was the genesis of the next 500 years of Western art. Smithsonian lecturer Professor William Kloss, an independent art historian, scholar, and curator, guides this artist-centered survey of hundreds of works created in Florence, Rome, and other Italian cities from 1400 to about 1520. The selected works reflect the humanism that went hand-in-hand with the rebirth of Classical culture to spark a creative revolution in the arts.

EVENTS THAT CHANGED THE WORLD

In this Great Courses lecture series, historian R. Rufus Fears winds a tale of pivotal events that altered the course of human history. His premise is that history hinges on great events that are shaped by great individuals and great ideas. Events selected for discussion range from new political or spiritual ideas, to crucial battles, to scientific advances, to influential leaders, to transformative cultural works. By understanding how and why these events occurred we can understand how the world became what it is today. Video lectures will be followed by discussion.

MERIDIAN STRETCHING

Classes will include a period of gentle warm up exercises, stretching, and strengthening exercises followed by cool down, meditation, and Qi gung. The exercises introduced, Qi gung, and meditation originated in various parts of Asia thousands of years ago. Qi gung is the use of repetitive movement coordinated with the breath and the experience of feeling Qi (Chi, Ki) in the body. At the end of each class we will “go around the circle” to share experiences and allow for questions. Classes are appropriate for people in any physical condition; exercises will be adapted to meet individual needs. Dress in comfortable clothing. Bring a yoga mat or beach towel and water to each class. Although every class will include floor work it is possible to participate while seated in a chair. Students are encouraged to be aware of their individual conditions, and while challenging themselves a bit each should work within their personal capacities. Did you know OLLI at UNLV has a Curriculum Committee responsible for selecting all the classes enjoyed by members? The process of planning for a new semester begins long before the first instructor steps up to the lectern. Members interested in teaching must submit a written course proposal to the Curriculum Committee. The committee meets to review proposals prior to submitting the classes for the catalog. The committee is also responsible for program evaluations.
IS THAT CONSTITUTIONAL?

Look at contemporary controversial issues in American politics and society and explore what, if anything, the U.S. Constitution has to say about each issue. We will watch and read opposing viewpoints and search for answers in the verbatim words of the Constitution. Next, we will see how the Supreme Court, Congress, and lower courts have interpreted those words or added to them with legislation or opinion, setting new legal precedents. We will not argue, and no viewpoints will be disrespected; rather, we will make a clinical examination of each issue and the laws pertaining to it. Finally, we will discuss possible solutions. Some possible topics or issues to be discussed: DACA, “anchor babies,” and other immigration issues; due process and equal protection; executive orders; free speech on college campuses; freedom of the press and “fake news;” global climate change; gun control; nuclear options and war; taking a knee; term limits; the Emoluments Clause; the Establishment Clause; and “The Wall.”

Sketching is an ideal way to absorb, appreciate, and capture your surroundings, whether during a trip abroad or a quiet moment in your back yard. We will work on new techniques in class, then have field trips around Las Vegas to practice sketching on location. Sketching is not about perfection, so beginners are welcome.

SHAKESPEARE: TEACHER’S PETS
This semester’s Shakespeare study focuses on three instructor favorites—each a triumph of Shakespeare’s understanding of human nature. *Love’s Labour’s Lost* was, at the time, a very topical play with playgoers easily recognizing the pretentious men. King Ferdinand and three friends vow to give up women and apply themselves to a life of study for three years. The arrival of a princess and her three attendants causes havoc among the men and much fun for the women. *Henry IV* deposed Richard II. He was tortured throughout his reign with the guilt of regicide, “friends” who wanted his crown, and a son cavorting in low places. Shakespeare introduces his second greatest character—the rascal Falstaff. *Richard III* is the instructor’s all-time favorite play. Richard was a deliciously evil man, killing everyone in his way to the throne. His opening soliloquy lays out his plan: charm when he can, murder when he can’t. Family or friend—it makes no difference. Audiences find themselves curiously rooting for Richard until he makes a fatal mistake. His toppling led to the Tudor succession and Elizabeth, so Shakespeare treads carefully.

FAMOUS FILMS B&W TO TECHNICOLOR 1927-1939
Follow the evolution of American films from the end of the B&W silent era in 1927 to sound and Technicolor by 1939. Films on our viewing list were selected from Oscar winners or nominations, and the unofficial, but valuable, list of the 100 best films. The Oscar had slightly different monikers in the early years but film lists were crossed checked with detailed film descriptions and ratings from IMDB so these selections do accurately represent popular offerings in the Depression years. During the Great Depression films were a brief respite from the anxiety of daily life and movie stars including Hepburn, Grant, and Garbo had an increasing influence on American culture. At the same time, film technology was quickly evolving, progressing from silent B&W films to high-quality color films. Viewers will not only enjoy the selections for their entertainment merit, but also note and discuss the changes in film techniques. Further, we will compare and contrast films of today with the films of 80+ years ago.

STRATEGIES FOR PAIN MANAGEMENT
If your life or the life of someone you love has been hijacked by pain, you are not alone. Pain affects more Americans than diabetes, heart disease, and cancer combined. In fact, one out of every three U.S. adults lives with chronic pain triggered by arthritis, chronic fatigue syndrome, disc problems, fibromyalgia, headaches, sciatica, or other causes. Chronic pain can rob you of your vitality, confidence, friendships, intimacy, and even your will to live. This course will provide a tried-and-true framework for coping with chronic pain caused by most sources. Among a multitude of helpful solutions and approaches presented, we will cover creating a pain management program, discuss why opioids fail to work for chronic pain, and stress the importance of building a health care team that combines professionals, caregivers, and other forms of social support. Strategies for Pain Management will give you tools to create and implement your unique pain management plan with your physician, plus guide you through physical exercises and a meditation practice. You will no longer need to postpone life until your pain goes away.

GREAT BATTLES OF THE CIVIL WAR...WHAT IF?
The passage of time makes the ultimate outcome of the Civil War-reunification of the United States and abolition of slavery-seem inevitable. But the war very easily could have turned out differently. Review the history of some of the over 5,000 battles waged in that war, from the events preceding them on through the manner in which they were conducted, and hypothesize how the outcome of each could have turned out differently if we altered one or two “fortuitous” incidents. We will examine the foibles of human beings whose actions affected multiple thousands of lives on the battlefield and all of history thereafter. We will also look at single acts of “fate” where mere inches changed the war. Discuss how a different ending on the battlefield might have altered the war’s political dynamics and influenced the balance of power.

BEGINs: Friday, January 26
TIME: 10AM-Noon

Instructor: David Gilyan earned his B.S. from Drake University followed by a law degree from Valparaiso University. He began practicing law in Indiana in 1964 and is now semi-retired. IN-DEPTH LOOK AT TWO OF WAGNER’S OPERAS
Take an in-depth look at two of Richard Wagner’s greatest operas: Tristan und Isolde and Die Meistersinger. Best known for his operatic compositions, Wagner gathers praise for his visionary integration of music and drama. Class will dissect the two tales, discuss the context in which they were composed, examine Wagner’s musical and theatrical innovations, and evaluate his impact on the worlds of opera, theater, and music.

BEGINS: Tuesday, January 23
TIME: 10AM-Noon

Instructor: Michael Smith is a retired casino dealer. He has a fair amount of community theatre experience and took courses in theatre in college. As a lifelong fan of the music of Richard Wagner, he aspires to help average people appreciate Wagner’s music and approach his artistic accomplishments as theatrical works. Smith hopes to guide people towards understanding Wagner’s music using layman’s terms rather than overwhelming them with musical terminology.

REMBRANDT: THE FINAL CHAPTERS
The Age of Rembrandt will introduce us to the art of 17th-century Holland. From this tiny land came great masters Vermeer, Frans Hal, Jan Steen, Peter de Hooch, and, of course, Rembrandt. Painting by painting, see how each artist’s technical choices about composition, lighting, color, or brush strokes contribute to a work’s overall impact. Work by Dutch artists offer insights into history and commerce of the period. Their great religious works addressed the spiritual conflicts of the times. Based on a 36-segment Great Courses series.

SAFETY AND PRIVACY IN THE 21ST CENTURY
Unfortunately, crime and violence are facts of modern life. But a life limited and dominated by fear is diminished. This course will provide knowledge and tools you can use to better safeguard yourself, your money, and your identity in today’s world. We will cover local crime statistics, risks, levels of awareness, and ways to increase your personal safety at home, in the car, and out in the world. You will learn what you can do if you ever need to physically defend yourself. A set of defensive techniques will be demonstrated which do not require brawn and are effective against larger, stronger, and younger attackers. We will also cover weapons, self-defense, and the law, and how criminals target and test potential victims. Every day we hear about cyber attacks and scams, and older people are disproportionately targeted. This course will raise your cyber IQ and scam awareness, and show you ways to counter the many schemes out there that seek to separate you from your hard-earned money.

6 WEEK COURSE
Thursday, January 25-March 1
TIME: 9:30-11:30AM

After retiring in 2015, Merritt decided to combine her love of teaching, expertise in technology, and background in self-defense to create a senior safety course addressing the physical as well as technological threats of today’s world.

CREATIVE WRITING
Writers will find their voice as they craft personal narratives, poems, autobiographies, and fictional short stories in a friendly and sociable atmosphere. Our focus will be on developing ideas and concepts that emphasize the expression of thoughts, feelings, and emotions versus simply conveying information. Every week we will encourage participants to apply new approaches and methods and to present their original writings orally in class. Feedback and discussion will follow each presentation.

EVENTS THAT CHANGED THE WORLD
In this Great Courses lecture series, historian R. Rufus Fears winds a tale of pivotal events that altered the course of human history. His premise is that history hinges on great events that are shaped by great individuals and great ideas. Events selected for discussion range from new political or spiritual ideas, to crucial battles, to scientific advances, to influential leaders, to transformative cultural works. By understanding how and why these events occurred we can understand how the world became what it is today. Video lectures will be followed by discussion.

TURNING A NEGATIVE INTO A POSITIVE, WITHOUT ALGEBRA

Reframe your thoughts so you can better appreciate all the great things happening in your life. Sometimes we get into a cycle of focusing on the challenges of our lives—health issues, money woes, family drama—and forget that we are also surrounded by positive things happening all around us. We can all use an hour or two during the week to focus on turning a negative into a positive, have some fun, meet new people, and nurture our creative writing talents. Guided writing prompts and interactions with peers will get your creative juices flowing. Write for 2-3 minutes on each prompt, and share your thoughts with the group if you are up for it.

BEGINS: Thursday, January 25
TIME: 10AM-Noon

Instructor: E.J. Levine’s home was severely destroyed in the 1994 Los Angeles earthquake. She and her husband moved to a furnished apartment complex called Oakwood; many other people who lost homes to the quake were living there as well. Every Sunday for the eight months they lived there, a brunch was provided. One Sunday morning, even though the sun was shining, Levine noticed the apparent “doom and gloom” look of the guests and declared, “No more!” Levine’s professional life was as a writer of advertising, promotion, and publicity for various movie and video companies. She knew how to sell a smile and began offering workshops on positive thinking to fellow Oakwood residents just for fun! 20 years later, she still loves to see the difference a positive outlook can have on someone’s life!

Mother Hubbard’s Cupboard Food Pantry provides healthy food to older adults and families in need, as well as nutrition and gardening education to help with making healthier food choices. I have met and developed deep friendships with people who share this love of learning. OLLI has become a very important part of my life, and I am extremely grateful that I was introduced to this wonderful program of adult education.”

Helene Spaulding

“Like my mother, I prefer to use my brain and share my life experience. There is no law that says when you retire you are supposed to play bingo! OLLI gives you options that a lot of “senior” organizations don’t! The experience of my fellow OLLI-ites has been mind-boggling and I am glad they are willing to share it.”

Evelyn Laurie  
Member since 2009

“Since 2013 my wife and I have been members. I must confess she persuaded me to join even though I was reluctant. What a great move. I love to learn, listen, and evaluate. The staff is top notch. It gives me a reason to get up and go. It keeps my mind active. It gives me ideas and purpose. What a great bargain!”

Bob Durkin

“OLLI has helped me to continue my lifelong desire to be in the educational field.”

Jennifer Neeman

“Retirees in Las Vegas are so lucky to have OLLI. For only $75 you could go to school five days a week and take up to three classes a day—what a bargain! OLLI offers so many different classes I can’t imagine anyone checking out our catalog and not finding something of interest. Over the years I’ve enjoyed language, dance, current affairs, even a class on Downton Abbey and another on wine tasting. There is something for everyone. Thank you UNLV for hosting or beloved OLLI!”

Linda Durkin  
Member since 2013

“I found OLLI at a time I had very little in my life. I was considered disabled and spent all my time at home, alone. I found OLLI on the UNLV website and came for a visit. I have been here ever since. I teach, serve on committees, and volunteer whenever I can. It fills my days with meaning and satisfaction. Nothing makes you feel better than helping others.”

Elena Cieslak  
Member since 2008

“I enjoyed OLLI so much that I became an instructor. I have taken a break to travel but love attending OLLI when not teaching. OLLI has definitely made a positive difference in my life both as an instructor and as a student.”

BEAUTY & THE BEAST

Saturday, February 17, 2018

Venture into a colorful world of magic and enchantment with the time-honored tale of Beauty and the Beast. Set to a lyrical score by Tchaikovsky, this NBT company premiere is a visually spectacular production celebrating the transformative power of love. From the mysterious forest filled with leaping stags and lively nymphs, to the beastly, imposing castle and its cursed occupants, this ballet is a feast for the senses. First created for San Francisco Ballet by the legendary Lew Christensen, the performance proved so popular it was revived each year for a decade. A generation later, it remains one of the best-loved stories of all time and a heartwarming fairy tale perfect for the entire family.

BALLET & BROADWAY

Sunday, May 6, 2018

The Great White Way is synonymous with incredible dancing and NBT is proud to close its 2017-18 season with two unforgettable pieces from Broadway and a world premiere specially commissioned for NBT.

The evening begins with Christopher Wheeldon’s Carousel (A Dance), a romantic, breathtaking distillation of the 1945 Richard Rodgers musical, which has become a sensation throughout the dance world since its debut with New York City Ballet on Rodgers’ centennial. Wheeldon went on to win a Tony Award® for his choreography in An American in Paris after Carousel propelled him into the spotlight as the next great American ballet master. Following will be the return of NBT’s critically-acclaimed performance of Slaughter on Tenth Avenue, choreographed by the legendary George Balanchine, from the Rodgers & Hart Broadway hit On Your Toes. This boisterous tale of jealously, forbidden love, and the mob wowed audiences in 2015 and NBT is thrilled to share this crowd pleaser with Las Vegas once again. Closing the program will be a new work specially commissioned for Nevada Ballet Theatre. This world premiere will be an exhilarating way to end a season filled with more—a season elevated to new heights.

Prior to all performances, NBT will present Insights, an educational pre-performance discussion offering patrons an opportunity to further engage with the ballet, with special guests, multi-media presentations, and more. Insights is free to all ticket holders and will take place in the Troesh Studio Theater, adjacent to Reynolds Hall, 45 minutes prior to curtain.
